C.N.

January 17th, 1918

Dean W. H. Ellis,
Faculty of Applied Science,
University of Toronto.

Dear Mr. Dean:

It has been laid down as a rule and acted upon ever since I came to Toronto that books were to be sold within the University only at the Students' Book Room. The Governors have authorised Mr. Hamilton, and his only, to sell these books at a low rate and hold from him a deposit of £2000 as a guarantee. They are now charging him a moderate rental, light and heat being included, for this privilege.

Several years ago I arranged with Mr. Hamilton that the Book Department should not come into competition with the Engineering Society by selling engineering supplies, such as drawing instruments and drafting materials. Nothing in this, however, shall interfere with the right of the Engineering Society to sell note books, fillers, and similar student requisites.

Yours sincerely,

President.

Board

UNIVERSITY OF TORONTO

FACULTY OF APPLIED SCIENCE AND ENGINEERING

45°

TORONTO, CANADA Feb. 16th, 1916

The President,
University of Toronto.

Dear Mr. President:-

The Engineering Society of the Faculty of Applied Science is desirous of bringing out one issue of its publication, "Applied Science", in the latter part of February to be called an Annual Issue, for the purpose of placing before our graduates the present condition of the Engineering Society and to show what the graduates and undergraduates of the School are doing for their King and country in this war. As a result of the war the attendance at the School has been reduced so that it has been found impossible to publish "Applied Science" without some assistance. The President of the Engineering Society has asked me to apply to the Board of Governors through you for some assistance in bringing out this issue. I am satisfied that the Society is doing its best to carry on its work in spite of adverse conditions and that they are deserving of assistance in this matter. If you could see your way to recommend a grant the Engineering Society would be very grateful and I should be very glad if something could be done to help them in this way.

Yours truly,

M. H. Ellis

Dean

Dean Ellis,

Faculty of Applied Science,
University of Toronto.

Dear Dean Ellis:

I send you the enclosed letter. Perhaps you will discuss this with other members of the science branches, both in your own Faculty and in Arts.

With kind regards, I am,

Yours sincerely,

President,

June 3rd, 1916

Dean Ellis,
Faculty of Applied Science,
University of Toronto.

My dear Dr. Ellis:

I am sending you a letter which I have just received from Colonel Ferreau. Would you be kind enough to see that his request is attended to and that he be given the opportunity to visit the various laboratories, probably including Physics.

I regret that I will be away that day. If you entertain him and Professor Martin at lunch at the York Club I will see that the amount is paid out of my appropriation.

With kind regards, I am,

Yours sincerely,

President.
